Lender Readiness: Not Yet Ready

Your model is a solid starting point, and now it's time to refine it. Focus on the high-priority recommendations first, and you'll see real progress. Every great school's financial story started as a first draft.

Packet Contents

1. Executive Summary
2. School Overview
3. Enrollment Plan
4. Revenue Model
5. Staffing Plan
6. Expense Summary
7. Capital & Debt
8. 5-Year Financial Projection
9. Cash Flow Analysis
10. Debt Service Coverage
11. Stress Testing
12. Lender Readiness
13. Financial Health Assessment
14. Key Risks
15. Appendix: Key Assumptions

This packet is generated from the school's financial model and is intended for lender review.
All projections are based on assumptions entered by the school founder.

Executive Summary

Your school projects \$0 in Year 5 revenue, with 4 of 9 key metrics that need attention. This is a starting point, and working through the recommendations below will help you build the financial story your mission deserves.

- [] Lender Readiness: Not Yet Ready
- [] Biggest Strength: Well-controlled staffing costs
- [] Biggest Risk: No facility location secured yet, so facility costs are estimated
- [] Cash Runway: 1 months

Lender Readiness

Lender Readiness: Not Yet Ready. Your model is a solid starting point, and now it's time to refine it. Focus on the high-priority recommendations first, and you'll see real progress. Every great school's financial story started as a first draft.

 Readiness Level: Not Yet Ready

Financial Health Assessment

Across 7 health dimensions: 4 healthy, 1 on watch, 2 at risk.

-  viability: Watch closely
-  liquidity: Needs attention
-  staffing burden: Healthy
-  facility burden: Healthy
-  revenue concentration: Healthy
-  days cash: Healthy
-  reserve strength: Needs attention

Health Dimensions

Dimension	Status	Details
Viability	Watch closely	The model reaches break-even by Year 1, but margins remain thin. A revenue shortfall could push it negative.
Liquidity	Needs attention	Cash goes negative in month 1. The school will need outside funding to continue operating.
Staffing Burden	Healthy	Staffing at 0% of revenue leaves room for facilities, programs, and reserves.
Facility Burden	Healthy	Facility costs at 0% of revenue are well-managed and leave budget for programs.
Revenue Concentration	Healthy	Revenue is anchored to enrollment-driven income — the strongest foundation for a school model. A focused revenue stream is a strength when backed by dependable demand.
Days Cash	Healthy	365 days of cash on hand exceeds the 90-day benchmark, providing a strong liquidity cushion.
Reserve Strength	Needs attention	Less than 1 month of reserves by Year 5. The school has no financial cushion.

Key Risks

4 risk factors have been identified. Of these, 1 is rated critical and should be addressed prior to lender submission.

[!] Cash runway is short: critical

[~] Operating reserves are thin: high

CRITICAL

Cash runway is short

A short cash runway means you need revenue to arrive on schedule with no delays. Any hiccup — late tuition payments, delayed public funding, or unexpected costs — could create a cash crisis.

Evidence: Cash runway: 1 months | Target: 18+ months

Mitigation: Build a cash buffer through startup fundraising, a line of credit, or by reducing early expenses. Target at least 18 months of runway before opening.

HIGH

Operating reserves are thin

Without adequate reserves, any unexpected cost or revenue dip could force emergency decisions — cutting programs, delaying payroll, or taking on expensive short-term debt.

Evidence: Reserve months: 0.0 | Target: 3–6 months

Mitigation: Look for ways to widen your surplus in the early years. Even small margin improvements compound into meaningful reserves by Year 3–4.

HIGH

Liquidity

Cash goes negative in month 1. The school will need outside funding to continue operating.

Evidence: liquidity: Needs attention

Mitigation: Build operating reserves through fundraising, lines of credit, or phased expense deployment to maintain adequate cash position.

HIGH

Reserve strength

Less than 1 month of reserves by Year 5. The school has no financial cushion.

Evidence: reserve strength: Needs attention

Mitigation: Establish a reserve fund policy targeting 3-6 months of operating expenses.

[!] Cash runway is short: critical

[~] Operating reserves are thin: high
