Health Dimensions

Dimension	Status	Details
Viability	Healthy	The model reaches net income early and sustains strong margins through Year 5.
Liquidity	Healthy	Cash stays positive throughout the projection and reserves exceed 3 months of expenses.
Staffing Burden	Healthy	Staffing at 16% of revenue leaves room for facilities, programs, and reserves.
Facility Burden	Healthy	Facility costs at 4% of revenue are well-managed and leave budget for programs.
Debt Affordability	Healthy	DSCR of 18.82x provides comfortable coverage of debt payments with room to spare.
Revenue Concentration	Healthy	Revenue is anchored to enrollment-driven income — the strongest foundation for a school model. A focused revenue stream is a strength when backed by dependable demand.
Reserve Strength	Healthy	183.0 months of reserves by Year 5 — a strong buffer for unexpected costs.

Key Strengths

The model demonstrates 5 notable strengths.

[+] Revenue per Student (Year 1): \$14,375

What to Watch

No significant financial risks have been identified at this time.

Recommended Next Steps

1. Plan for Tuition Collection & Discount Risk

Private schools face collection risk from late payments, withdrawals, and financial aid shortfalls. With 95.7% of revenue from tuition, build a 5–10% bad debt reserve into your budget. Factor in tuition discount rates for merit/need-based aid and maintain clear enrollment contracts with payment terms.

This strengthens the model and reduces future risk.

2. Address Cash Reserve Deficit from Prior Year

Last year ended with \$120,000 in cash, only 0.7 months of expenses. Building reserves to 3+ months should be a priority. Consider a bridge line of credit while growing into net income.

Addressing this will materially improve financial position.

3. Document Your Growth Strategy

Great projections are backed by a clear plan. Document your marketing strategy, enrollment pipeline, and community outreach, as this is the roadmap that turns your numbers into reality.
This strengthens the model and reduces future risk.

Scenario Comparison

The model includes 2 scenarios showing how changes in key assumptions affect Year 5 outcomes.

Scenario	Y5 Revenue	Y5 Net Income	Y5 Margin
Slow Growth (flat enrollment Y2-3)	\$5.6M	\$4.5M	81.1%
Strong Growth (+10% enrollment)	\$7.2M	\$6.0M	83.1%
